Hello,

Thanks for the call just now, John. Per our conversation, I will reach out to the city for the contact information on this list to prepare and send out the letters notifying both residents and owners they will receive a tree. My goal will be to send these out by mid November so everyone has 2 weeks to opt out if they want. Our goal will be to plant in January.

Below is the list of addresses and the species that have been selected by Rob, the Urban Forestry Manager. Any leg work you can do ahead of time to notify people if they're on this list is much appreciated. Following the planting, we will provide resources on how best to care for the trees and your help in encouraging stewardship is much appreciated.
